

Task_1: Create a Git repository and write the step by step process .

- **Step 1:**

1. Log in to your GitHub account (or create one if you don't have it).
 2. Click on the New button to create a repository.
 3. Name the repository with your enrollment number (2301031000092).
 4. select visibility (public or private).
 5. Initialize the repository with a README file (optional).
 6. Click Create Repository.
-

- **Step 2: Add Folders for Assignments:**

1. Open your repository on GitHub.
2. Click on Add File > Create New File.
3. In the filename field, type Assignment_1/README.md (this creates a folder)
4. Add some content (e.g., "This folder is for Assignment 1").
5. Commit the file.
6. Repeat the steps for Assignment_2.
